

## Problem when downloading ReadHear Mac?

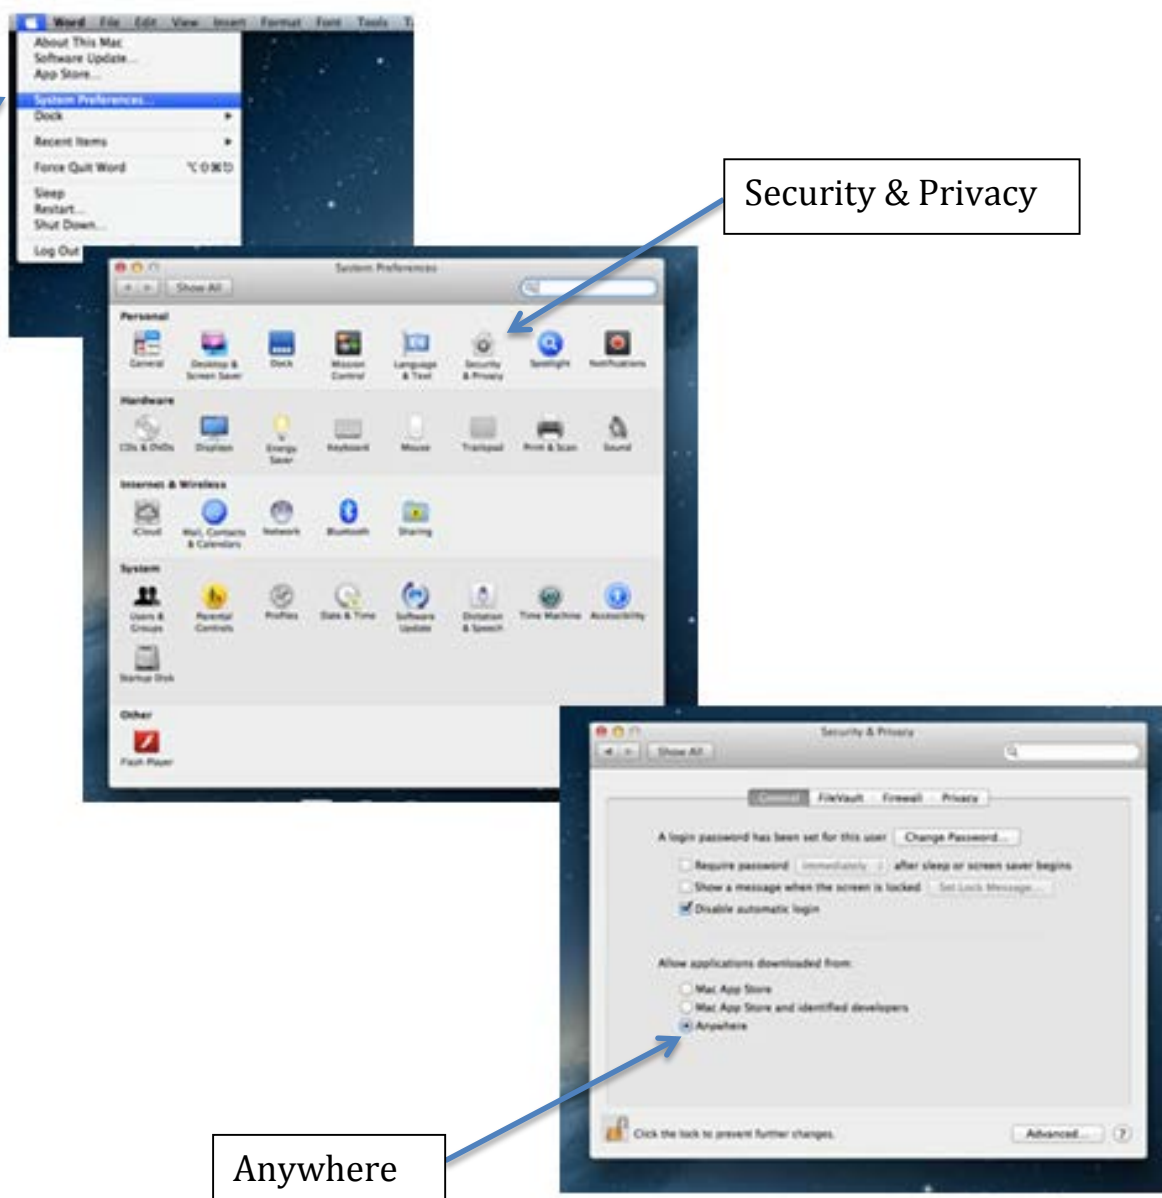

**Web Browser:** Use **Safari** (not Firefox).

### Security Preferences

You **may** have to change the security preferences on your Mac, when downloading ReadHear Mac.

**Go to:**

System Preferences → Security & Privacy → check the box **"Anywhere"** (Allow applications download from).

**Please note!** You will need your Apple ID to make this change.

Don't forget to reset the security settings to default **"Mac App Store and identified developers"** once you are finished installing the program.
